

Alanis Sun

Cocoa, FL | 321-750-7281 | yushuangsun36@gmail.com
US Permanent Resident | Bilingual: English and Mandarin Chinese

Professional Summary

Clinical research professional with 6+ years supporting Phase I/II clinical-development programs in a GLP biotech environment, with experience in clinical sample, data, and supporting-document workflows, CRO and internal clinical-team coordination, discrepancy investigation, and regulated documentation. Additional experience includes phased project planning, dependency tracking, and weekly status reporting.

Professional Experience

Manager, Lab Operations

Akesoe Biologics | Winter Springs, FL | May 2026–Present

- Developed a phased plan for an approximately 7–9 phase early-stage stem-cell project by breaking early phases into detailed tasks, assigning responsibilities, identifying dependencies, and tracking progress in ClickUp.
- Prepared weekly project-status reports summarizing completed work, potential impacts, next steps, and pending follow-ups; coordinated cross-functional inputs, resource needs, and issue follow-up.
- Reviewed 30+ SOP/DCR records and electronic documents, identified documentation and version inconsistencies, and supported documentation and form-completion improvements.
- Identified a compliance/resource-allocation risk related to a proposed GMP certification approach, researched the issue, and recommended a gap-based assessment that led to an internal mock-audit exercise.
- Supported vendor/equipment evaluation through requirements definition, vendor discussions, quotation review, and comparison of options for decision support.

Research Associate I

Vaxxinity | Merritt Island, FL | Oct 2018–Jan 2025

- Supported Phase I/II clinical-development programs in a GLP environment through clinical bioanalytical ELISA testing, assay validation, QC, troubleshooting, data analysis, and communication of results and supporting documentation to CRO data teams.
- Worked with 4,000+ clinical samples in a Phase I sample-management workflow through receipt/source-document verification, CRO/internal ID traceability, Benchling records, exception investigation, and coordination with sample-management personnel on retrieval and return.
- Investigated a CRO calculation/data discrepancy by reviewing underlying assay data and supporting documentation, clarifying methodology, confirming visit-timing interpretation with the internal clinical team, and reviewing corrected CRO output.
- Coordinated assigned technical and data issues with CRO data teams, internal clinical teams, sample-management personnel, and supervisors to support documentation accuracy and issue resolution.
- Analyzed assay and titer data using Excel and GraphPad Prism, including cut-point analysis, titer determination, precision assessment, and %CV calculations.

Education

M.S., Biomedical Science, Physiology & Pharmacology — Chang Gung University | 2017–2018

Research focus: Oncology/MDR, cell-based translational assays, and drug-mechanism studies

B.S., Biomedical Science — Chang Gung University | 2013–2017

Certifications

- Google Project Management Certificate — Google, 2025
- Data Management for Clinical Research — Vanderbilt University, 2025

Skills

Clinical Research & Documentation: Phase I/II clinical-development support, GLP documentation, clinical data and supporting-document review, CRO data-transfer support, discrepancy investigation, corrected-output review, clinical sample traceability, exception investigation, SOP/DCR review, documentation consistency, CAPA documentation

Project Coordination: Phased project planning, task breakdown and assignment, dependency tracking, ClickUp tracking, weekly status reporting, cross-functional coordination, issue and follow-up tracking, resource-needs coordination, vendor/equipment evaluation support, quotation review

Tools & Analysis: Excel, GraphPad Prism, Benchling, Smartsheet, ClickUp, Asana, Notion, SharePoint, Microsoft Teams, Codex

Publications

- Co-author of a 2024 *Nature Medicine* publication related to Vaxxinity/UB-312 active immunotherapy work.
- Co-author of a 2025 *Communications Medicine* publication related to Vaxxinity/VXX-401/CGRP work.
